OBJECTIVE

Automation, AI & Data Engineer with hands-on experience in intelligent web development and production grade workflow automation. Currently working **full-time at LatentHQ**, building **intelligent web systems, API-driven integrations, and scalable backend solutions**. Previously completed a **research internship at DRDO**, contributing to **simulation modelling, NLP and data analysis** using Python.

EDUCATION

MIT-ADT University, Pune

2023 – Current

Bachelor of Technology in Computer Engineering

Consistent academic performance with CGPA: 8.29 / 10

TECHNICAL SKILLS

Programming Languages:	Python, R, C++
Web & Backend Development:	Streamlit, WordPress, Framer,
Machine Learning, AI, Deep Learning, Computer Vision, Data Analysis:	Supervised Learning, Neural Networks, Model Training, Model Evaluation, PyTorch, TensorFlow, Scikit-learn, OpenCV, CNN, Image Processing, Tableau, EDA, Rstudio
Automation & Workflow Engineering:	Zapier, n8n, Webhooks, Google APIs (Sheets, Drive, Gmail)

EXPERIENCE

Tech Intern — Alpha OBS

Sept 2024 – Present

Pune, India

- Built **3 internal automation tools** in Python, including an **offer-letter generation system**, reducing manual HR documentation time by **~70%**.
- Developed a **document-query chatbot** using the OpenAI API that retrieves answers from **100+ page internal documents**, enabling instant information access for team members.
- Designed a **project manager dashboard analysing 5k+ operational records**, automating progress tracking and reducing manual reporting effort by **~60%**.

Research Intern — Defence Research and Development Organisation

June 2025 – July 2025 | Dec 2024 – Jan 2025

Jodhpur, India

- Developed C#-based simulation models of real-time aircraft flight, for research, and testing purposes.
- Implemented structured NLP pipelines using TensorFlow, and BERT for defence-related document analysis.
- Authored documentation and collaborated with research scientists for prototype evaluation and testing.

MAJOR PROJECTS

Projects Management Dashboard—

- Developed a **Streamlit analytics dashboard** integrating **Jira and spreadsheet APIs** to monitor project KPIs, visualize performance trends, and support data-driven forecasting with **~80% accuracy**.

Document-Based Chatbot System —

- Developed a Flask-based document-aware chatbot integrating API-driven retrieval mechanisms to process uploaded documents and generate context-based responses.

Offer Letter Automation System—

- Designed an HR workflow automation pipeline using Zapier, Google Forms, and Google Sheets APIs to generate offer letters automatically, reducing manual document processing and improving onboarding turnaround time by 60%

Sensor-Based Badminton Performance Analysis (In Progress) —

- Developing a computer vision-based sports analytics system using video processing and motion tracking to extract performance metrics and gameplay patterns.

Smart Farm Automation System (In Progress) —

- Building a web-controlled IoT automation platform integrating sensor data, remote monitoring, and rule-based irrigation control for scalable farm management.

LEADERSHIP & ACHIEVEMENTS

- Selected as Research Intern at Defence Research and Development Organisation (DRDO) for simulation modeling and data analysis projects.
- Delivered automation systems deployed in live production environments at LatentHQ.
- Actively contributed to technical projects in machine learning, automation engineering, and computer vision with end-to-end ownership and deployment.
