OBJECTIVE

Computer Engineering student with experience in software development, automation, data analytics, and AI-powered solutions. Proven ability to build applications, streamline processes, and analyse data to solve real-world problems. Skilled in programming, problem-solving, and developing technology solutions that drive efficiency and measurable impact.

EDUCATION

MIT-ADT University, Pune

2023 – Current

Bachelor of Technology in Computer Engineering

Consistent academic performance with CGPA: 8.29 / 10

TECHNICAL SKILLS

Programming Languages:	Python, Java, C++
Data Analysis & Visualization	Data Analysis, Dashboard Development, Tableau, Microsoft Excel, Google Sheets, KPI Tracking, Reporting, Data Visualization
Web & Application Development:	Streamlit, WordPress, Framer, ReactJS
Automation & Workflow Engineering:	Zapier, n8n, Webhooks, Workflow Automation, Google APIs (Sheets, Drive, Gmail)
AI / ML & Computer Vision	Machine Learning, Deep Learning, Neural Networks, Model Training, Model Evaluation, Computer Vision, Image Processing, CNNs, PyTorch, TensorFlow, Scikit-learn, OpenCV
Development & Tools	Git, GitHub, Git CodeSpace, Claude Code,

EXPERIENCE

Tech Intern — LatentHQ (a venture of Alpha OBS)

Sep 2025 – Apr 2026

Pune, India

- Developed **Python & Zapier-based automation tools** to streamline **HR and operational workflows**, reducing **manual documentation** effort by approximately **70%**.
- Built an **AI-powered document retrieval system** using **RAG techniques**, enabling **contextual search** across **large internal document repositories**.
- Designed and **developed a project analytics dashboard** by analysing **5,000+ operational records** to **track KPIs**, project progress, and delivery metrics.
- Automated reporting workflows** and data pipelines, **reducing manual reporting** effort by approximately **60%** and improving operational visibility.

Research Intern — Defence Research and Development Organisation

Dec 2024 – Jan 2025 | Jun 2025 – Jul 2025

Jodhpur, India

- Developed **simulation models** for **aircraft system behaviour analysis**, **testing**, and **performance evaluation**.
- Performed structured analysis of **technical datasets** and **research documents** to support **ongoing R&D activities**.
- Assisted in **prototype testing**, **result validation**, **technical documentation**, and **performance assessment** of research systems.
- Collaborated with research teams** to analyse data, **solve engineering problems**, and **improve evaluation workflows**.

MAJOR PROJECTS

Project Management Analytics Dashboard—

- Built a **Streamlit-based analytics dashboard** integrating **Jira and spreadsheet APIs** to **monitor KPIs**, **project progress**, **delivery timelines**, and **team performance** across **5,000+ records**.
- Automated reporting** and **data analysis workflows**, **reducing manual effort** by approximately **60%** while improving operational visibility and decision-making.

HR Workflow Automation System—

- Developed **workflow automation solutions** using **Python**, **Zapier**, **n8n**, **APIs**, and **Google Workspace integrations** to **streamline HR** and operational processes.
- Reduced manual documentation effort** by approximately **70%** and **improved reporting accuracy** through automated data collection and processing.

AI-Powered Knowledge Retrieval System—

- Built a **document intelligence platform** using **RAG architecture**, **LLMs**, and **vector-based retrieval** to **enable contextual search** across **large document repositories**.
- Improved information retrieval speed** and **reduced manual search effort** by providing **accurate, context-aware responses**.

Talk to Khush — AI Portfolio Chatbot—

- Built a **conversational AI chatbot** using **RAG architecture** to enable **instant querying** across **10+ projects**, **skills**, and **experience data**.
- Developed and deployed** the application using **Next.js** and **JavaScript**, **reducing recruiter response time** by **80%** through **real-time information retrieval**.

LEADERSHIP & ACHIEVEMENTS

- Selected as Research Intern at Defence Research and Development Organisation (DRDO) for simulation modeling and NLP-based data analysis
- Python for Data Science, AI & Development** — IBM, Coursera (Apr 2026)
- Deep Learning, NLP, and AI Applications** — Packt, Coursera (Apr 2026)
- Built and deployed analytics dashboards and automation tools used in live operational workflows, supporting reporting, KPI tracking, and business decision-making.
